deferred annuity from ABSLI at the then prevailing annuity rate (currently we offer ABSLI Immediate Annuity Plan) or subject to the point 3 below, you shall be given an option to purchase immediate annuity or deferred annuity from any other insurer; or

3. You shall be given an option to purchase immediate annuity or deferred annuity from another insurer at the then prevailing annuity rate to the extent of percentage, stipulated by the Authority, currently 50%, of the entire proceeds of the vesting benefit net of commuted value.

The purchase of annuity shall be subject to terms and conditions under the annuity product. In case the proceeds of the policy on vesting is not sufficient to purchase minimum annuity as defined in Regulation 3(a) of IRDAI (Minimum Limits for Annuities and Other Benefits) Regulations, 2015, as amended from time to time, such proceeds of the policy shall be paid to you or your beneficiary as a lump sum.

You also have an option to extend the accumulation period, provided you are below the age of 60 years and provided maximum vesting age is not more than 80 years subject to boundary conditions of this product.

In case you have opted for the Assured Option, during this extended accumulation period, your Single Premium will continue to be invested in Income Advantage Guaranteed Fund and Guaranteed Additions will continue to be paid. In case of death during this period while the policy is in effect, the death benefit shall be calculated as per the Death Benefit section. Please ask your financial advisor or visit our website to understand the available products at the time of your vesting.

Death Benefit

In the unfortunate event the life insured dies while the policy is in effect, we will pay to the nominee the greater of (a) the Guaranteed Death Benefit or (b) Policy Fund Value as on date of intimation of death.

The Guaranteed Death Benefit is equal to 105% of all basic premiums paid less partial withdrawals made during two-year period immediately preceding the death of the life assured.

Your nominee then has the choice to withdraw the death benefit proceeds; or utilise the entire proceeds or a part thereof to purchase an immediate annuity or deferred annuity at the then prevailing annuity rate from ABSLI. However, your nominee or beneficiary shall be given an option to purchase annuity from any other insurer at the then prevailing annuity rate to the extent of percentage, stipulated by the Authority, currently 50%, of the entire proceeds of the policy net of commuted value.

In case the proceeds of the policy are not sufficient to purchase minimum annuity as required by the Authority from time to time, your nominee will be paid the proceeds of the policy as a lump sum.

Surrender Benefit

At any time while your policy is in force you can request to surrender this policy for its Surrender Benefit. Any such surrender will be treated according to the Policy Discontinuance provisions mentioned in this document.

Your Investment Options

Assured Option

Under this investment option your portfolio will be structured depending on chosen vesting date and risk profile. We will invest your basic premiums between the two investment funds – Maximiser Guaranteed (an equity fund) and Income Advantage Guaranteed (a debt fund) in a predetermined proportion based on the selected vesting date and risk profile. Thereon, we will manage and administer your investment portfolio on your behalf, thus saving you time and effort. Over time the allocation is managed such that it will automatically switch from riskier assets to safer assets progressively as your plan approaches vesting (your anticipated retirement date).

The proportion invested in Maximiser Guaranteed (an equity fund) will be according to the schedule given below – the remaining amount will be invested in Income Advantage Guaranteed (a debt fund):

Years to Vesting	Risk Profile		
	Aggressive	Moderate	Conservative
5	0%	0%	0%
6 – 10	20%	15%	10%
11 – 15	40%	30%	20%
16 – 20	60%	45%	30%
21 – 25	80%	60%	40%
26 – 30	100%	75%	50%

We will automatically rebalance the asset allocation mix over time such that the equity exposure progressively reduces as the policy approaches vesting (with 0% equity exposure in the last 5 years of the accumulation period).

With the approval from the IRDAI we may at any time close an segregated fund available in your policy. We will inform you in writing of such closure no later than 60 days before we actually close the segregated fund.

Allocation / Redemption of Units

On each business day, the instructions for investing in or encashing units from an segregated fund must be received and accepted by 3.00 p.m. Instructions accepted by us up to the cut-off time are executed using the unit price determined at the end of that business day. Instructions accepted by us after the cut-off time will be executed using the unit price determined by us at the end of the next business day.

Instruction to invest is deemed accepted by us when we receive cash, demand draft or local cheque at any of our offices by duly authorized officials. For outstation cheque, instruction to invest is deemed accepted by us only on the day we receive credit in any of our bank accounts.

The number of units allocated equals the monetary amount invested in an segregated fund divided by its unit price at that time. Units are allocated when we receive a premium or when guaranteed additions are added to the fund value.

The number of units redeemed equals the monetary amount encashed from an segregated fund divided by its unit price at that time. On each monthly processing date, policy charges will be covered by redeeming units from all investment funds under your policy in proportion to their value at that time.

Unit Price

On each business day and for each segregated fund, we determine the unit price by dividing the net asset value (NAV) of the investment fund at the valuation time by the number of units in existence for the investment fund in question. We publish the unit price of all investment funds on our website www.lifeinsurance.adityabirlacapital.com.

The net asset value (NAV) is determined based on (the market value of investments held by the fund plus the value of any current assets less the value of any current liabilities & provisions) divided by (the number of units existing at valuation date before creation or redemption of any units)

Policy Loan
