YOUR INVESTMENT STRATEGIES

Under **ABSLI Wealth Infinia**, you can choose to invest your premiums in one of the five investment strategies.

- 1. Systematic Transfer Investment Option** is an option for individuals who would like to eliminate the need to time one's investments in the market.
- 2. Return Optimiser Investment Option** is an option for individuals who would like to have optimal participation in the capital markets while safeguarding their returns from any market related volatilities.
- 3. Self-Managed Investment Option** is an option for individuals who would like to have complete control over their investment.
- 4. Smart Investment Option** is an option for individuals who would like to take care of ever-changing financial needs as per their increasing age.
- 5. Life Cycle Investment Option** is an option for individuals who would like to create an ideal balance between equity and debt, based on their age.

1) Systematic Transfer Investment Option:

The Systematic Transfer Investment Option safeguards your wealth against the market volatilities and is available only if you have opted for a Single Pay policy or a policy taken with annual mode as their Premium Payment mode. Your Single Premium/Annualized Premium (net of premium allocation charge) shall be first allocated to Liquid Plus fund and immediately thereafter and on each subsequent monthly anniversary, will be switched to one or more fund(s) of your choice. On each monthly anniversary, Fund Value of [1/(13- policy month)] of the units available in Liquid Plus fund will be switched to the fund, chosen by You, at its then prevailing NAV by cancelling the units in Liquid Plus fund.

You may choose up to a maximum of four Funds out of Income Advantage, Enhancer, Maximiser, Super 20, Capped Nifty Index, Multiplier, Value & Momentum, Creator, MNC, ESG Fund & Small Cap Fund for your premiums to be transferred to. We record your allocation instructions as per the premium allocation percentages specified in the application form. Our only requirement is that the percentage allocated to chosen fund(s) be in increments of 5%, ranging from 5% to 100%. The total allocation across all funds must be 100%.

This option helps mitigate any risk arising from volatility and averages out the risks associated with the equity market, reducing the overall risk to your portfolio.

During the period when Systematic Transfer Investment option is in-force, Partial Withdrawal shall not be allowed from Liquid Plus fund. You will not have an option to redirect premiums or exercise switches during the period this option is applicable from liquid plus fund. You may opt out of or opt for the Systematic Transfer Investment option by giving a written request to the Company. Once accepted, the request shall be effective on or from the policy anniversary following the receipt of such request. In case You fail to pay the due Annualized premium within the grace period, the Systematic Transfer Investment option shall cease to apply, and the Annualized premium received after the expiry of grace period shall be allocated to the fund(s) chosen by You in the specified proportion or any other fund as chosen by You. Hence, You have an option to choose the fund of Your choice in case the Annualized Premium is paid after the expiry of grace period. The Systematic Transfer Investment option shall be automatically applied for all future Annualized Premiums received thereafter but within the grace period, unless advised otherwise.

2) Return Optimiser Investment Option:

The Return Optimiser Investment Option enables you to take advantage of the equity market, protect your gains from the future market volatility and create a more stable sequencing of investment returns. Under this option all your Single Premium/Annualized Premium (net of premium allocation charges) are invested in Maximiser fund and it will be tracked every day for each policyholder for a pre-determined upside movement of 10% or more over the net invested amount (net of all charges). In the situation where the gain from the Maximiser fund reaches 10% or more of the net invested amount, the amount equal to the appreciation will be transferred to the Income Advantage fund at the prevailing unit price. This ensures that your gains are protected from any future market volatilities. In the situation where the gain is less than the pre-determined upside movement of 10%, the Fund Value will continue to remain in the Maximiser fund and no transfers will be made to the Income Advantage fund.

The Return Optimiser Investment Option can be explained with the help of an example: For Age 30, Male, Annualized Premium – ₹2,00,000, Policy Term – 20 years, at the end of the third policy year,

Total Annualized Premiums Paid (invested in Maximiser Fund)	₹6,00,000
Less charges deducted from Maximiser Fund (Premium Allocation Charge, Mortality Charge and applicable taxes)	₹43,529
Net invested amount in the Maximiser Fund	₹5,56,075

Suppose the Fund Value is now ₹6,12,000 which is higher than 6,11,682 (i.e. 110% of the net invested amount of 5,56,075) then ₹55,925 (i.e. 6,12,000 – 5,56,075) will be transferred to Income Advantage Fund.

If the Fund Value is less than ₹6,11,682 then there will be no transfer to Income Advantage Fund.

3) Self-Managed Investment Option:

Self- Managed Investment Option gives you access to our well-established suite of 18 funds, complete control in how to invest your premiums and full freedom to switch from one fund to another.

Our 18 funds range from 100% debt to 100% equity to suit your specific needs and risk appetite – Liquid Plus, Income Advantage, Assure, Protector, Builder, Enhancer, Creator, Magnifier, Maximiser, Multiplier, Super 20, Pure Equity, Value & Momentum, Capped Nifty Index, Asset Allocation, MNC, ESG Fund & Small Cap Fund. Accordingly, the Single Premium/Annualized Premium (net of premium allocation charge) shall be allocated to the fund(s) chosen by You. If you wish to diversify your risk, you can choose to allocate your premium in varying proportions amongst the 18 funds. We record your allocation instructions as per the premium allocation percentages specified in the application form. Our only requirement is that the percentage allocated to any fund be in increments of 5%, ranging from 5% to 100%. The total allocation across all funds must be 100%.

To meet your ever changing investment needs, you have full flexibility to redirect future premiums by changing your premium allocation percentages at any time. You also have full flexibility to switch monies from one fund to another at any time provided the switched amount is for at least ₹5,000.

4) Smart Investment Option:

Under the Smart Investment Option, your portfolio will be structured as per your maturity date and risk profile (Conservative, Moderate, Aggressive). We will invest your Single Premium/Annualized Premium (net of premium allocation charge) between the two funds – Maximiser (equity fund) and Income Advantage (debt fund) in a predetermined proportion based on the selected maturity date and risk profile (Conservative, Moderate, Aggressive). Over time the allocation is managed such that it will automatically switch from riskier assets to safer assets progressively as your plan approaches maturity.

The proportion invested in Maximiser (equity fund) and Income Advantage (debt fund) will be according to the schedule given below:

Outstanding term to Maturity	Risk Profile and Exposure in % to funds					
	Aggressive		Moderate		Conservative	
	Maximiser	Income Advantage	Maximiser	Income Advantage	Maximiser	Income Advantage
21 & above	90%	10%	70%	30%	50%	50%
16-20	80%	20%	60%	40%	40%	60%
8-15	65%	35%	50%	50%	30%	70%
4-7	50%	50%	25%	75%	15%	85%
0-3	20%	80%	10%	90%	5%	95%

You can change your risk profile at any time with no additional cost. All premiums paid from that point onwards will be invested in the Maximiser and Income Advantage according to your new risk profile.

You will not have an option to redirect premiums or effect unit switches during the period this option is in force. You may opt out of this option anytime during the Policy Term, which will then be effective from the next policy anniversary. Post opting out, you will be allowed to exercise free Switches or Premium Redirection options. We will automatically rebalance your investment portfolio on each policy anniversary to ensure that it maintains the predetermined proportion in Maximiser and Income Advantage as per the risk profile you have selected.

5) Life Cycle Investment Option

Under the LifeCycle Option, your portfolio will be structured as per your age and risk profile – all you need is to decide on your risk profile – Conservative, Moderate or Aggressive. We will automatically shift your investments from riskier assets to safer assets progressively with your age. We will invest your Single Premium/Annualized Premium (net of premium allocation charge) between the two funds, Maximiser (Equity Fund) and Income Advantage (Debt Fund) in a predetermined proportion based on the selected risk profile and your age when the premium is invested.

The percentage allocation to Maximiser according to age and risk profile is as given below:

Age Group	Risk Profile		
	Aggressive	Moderate	Conservative
1 – 30	90%	70%	50%
31 – 40	80%	60%	50%
41 – 50	70%	50%	30%
51 – 60	55%	35%	15%
61 – 70	40%	20%	0%
71 +	25%	5%	0%

We will automatically rebalance the Fund Value between these fund options according to then applicable percentages.

You do not have an option to redirect premiums or effect unit switches during the period this option is in force. You may opt out of this option anytime during the Policy Term, which will then be effective from the next policy anniversary. Also post opting out, you will be allowed to exercise free Switches or Premium Redirection options.
